

# PHENIX Mock Data Challenge goals

Our goals for the PHENIX Mock Data Challenge can be summarized as follows:

We believe, that we will be able to

1. determine the **vertex position** as precisely as possible
2. apply the proper **calibration**
3. accumulate the  **$dN/d\eta$  spectra** of charged particles

Fill in the existing **STAF** data tables with the **correct** information.

See the example on the next slide !
